

Priority 2

Objective 2:

Our Environment -
A Greener Future

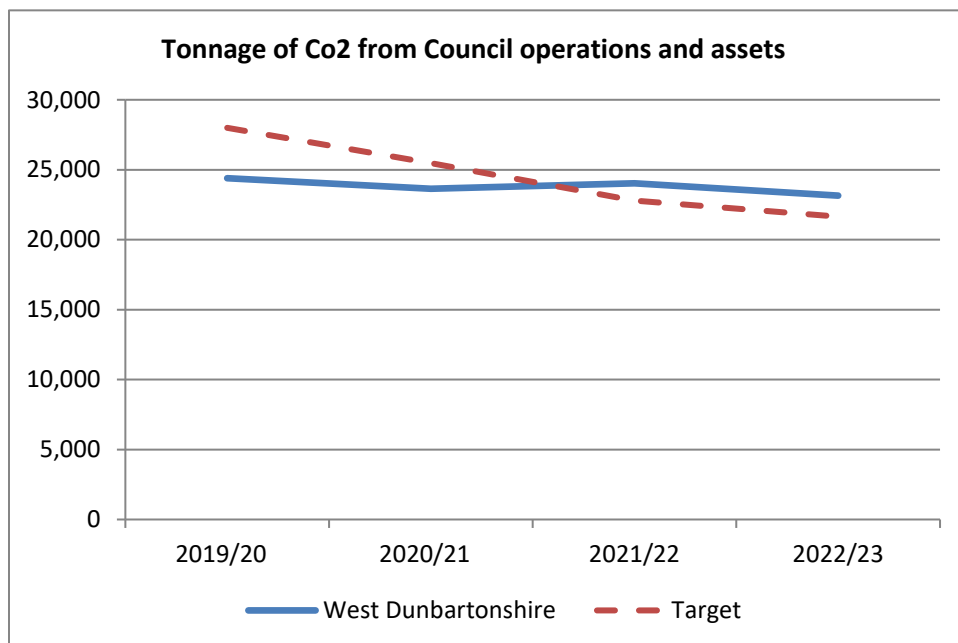

Indicator:

Tonnage of carbon dioxide emissions
from Council operations and assets

Target:

21,649 tonnes

What does the data say?

Results for 2022/23 show that the Council's carbon footprint has reduced by 3.6% from the previous year, but falls short of the target set 21,649 CO₂e.

Factors affecting the performance include: Covid 19 recovery, resources, new stricter targets and increases in household waste levels.

A newly formed Climate Change and Energy team will provide renewed focus on the Climate Change Action plan for 23/24 and will continue to identify and implement measures for reducing carbon emissions.

Measure will be updated when 2023/24 data becomes available in early 2025.
